

J. Bruce Higgins

Jadenbrucehiggins@gmail.com | (801) 941-0529 | Layton, UT

IT Specialist with extensive experience in identifying and mitigating software vulnerabilities and driving efficiency improvements. Proven success in maintaining 99.999% system uptime, automating critical security processes, and leading projects from conception to completion. Expertise in left-shifting security in SDLC, API integrations, and cross-functional collaboration to reduce risks and streamline security operations.

Work History

TAB Bank

Ogden, UT

Application Security Specialist

August 2024 – Present

- Developed automation scripts using python that saved over 200 hours annually, improving security audit processes and reducing manual errors.
- Collaborated with cross-functional teams to create custom vulnerability backlogs, reducing response time to security issues and improving resolution efficiency by 30%
- Engineered API integrations using Python and Bash, enhancing security posture by shifting vulnerability detection earlier in the SDLC, resulting in 25% faster threat resolution.
 - Alerts the change managers to new vulnerabilities before the new code is merged with production.

Security Engineer

September 2023 – August 2024

- Deployed Gigamon to enhance network traffic visibility, increasing detection of anomalous traffic patterns, which helped to proactively identify and mitigate security threats.
- Identified and mitigated over 300 vulnerabilities using Tanium, significantly reducing the bank's exposure to security threats by 15%.
- Spearheaded security awareness campaigns and collaborative projects with IT teams, resulting in a 20% improvement in security protocol adherence across the organization.

Systems Engineer

November 2022 – September 2023

- Provisioned and maintained servers, deployed updates to applications, and managed critical services (VMware, Active Directory, DNS), optimizing infrastructure and reducing downtime by 20%.
- Led the restoration process during bank-wide outages, minimizing service disruption and reducing recovery time through efficient troubleshooting and coordination.

America First Credit Union

Roy, UT

Project Engineer

October 2020 – November 2022

- Managed end-to-end planning, development, and deployment of critical IT projects, including member-facing products, resulting in improved user experience and operational efficiency.
- Conducted thorough analysis and provided actionable insights that led to the implementation of key organization-wide changes, improving operational efficiency and earning a Special Achievement Recognition (SAR).

Education & Certifications

Bachelor of Science in Cybersecurity and Network Management

Weber State University, Ogden UT – Graduated 2023

Cyber Security Essentials – Certificate of Proficiency

Weber State University, Ogden UT - 2021

AWS Certified Cloud Practitioner

Professional Scrum Master I

Associate of ISC2

Technical Skills

Programming Languages:

- Python, Java, SQL, Visual Basic

Scripting:

- Bash, PowerShell

Server Administration:

- Linux Server, Windows Server (Active Directory, Group Policy, DNS)

Cloud Administration:

- AWS (Administration & Security), VMware

Security Tools:

- Tanium, Rapid7, Splunk, Imperva, Blackduck, Burp Suite, Mimecast

Automation & API Integrations:

- GitHub, Axonius, Argo Workflows

Scanning & Security Assessments:

- SCA, DAST, SAST scanning

Project Management:

- Agile/Scrum methodologies, Jira, Confluence
